EDUCATION

Master of Arts Economics | Eastern Michigan University
Bachelor of Science Computer Science | Oregon State University
Bachelor of Science in Pharmaceutical Sciences | University of Toledo

TECHNICAL EXPERIENCE

Oregon State University | *Teaching Assistant (Database & Software Verification)* | Remote Mar. 2024 – Jun. 2026

- **Database Code Auditing (CS 340 Intro to Databases):** Evaluated relational database schemas, audited complex SQL queries, and analyzed data integrity across 30+ student groups per term.
- **Algorithmic Analysis (CS 261 Data Structures):** Guided low-level data structure memory management and algorithmic efficiency for core structures including hash maps, trees, arrays, and linked lists.
- **Verification Testing (CS 362 Software Engineering 2):** Administered automated test coverage implementations and test suite scaling.

Prota Ventures | *Ruby on Rails Developer & Studios Partner (Contract)* | Remote Mar. 2022 – Apr. 2022

- **Data Validation & Pipeline Refactoring:** Patched data validation logic across backend controllers and models, ensuring robust data integrity for production environments.
- **Automated Test Scaling:** Expanded core system test coverage using RSpec and Capybara to handle edge-case data errors.

Independent Consultant | *Android Engineer* | Remote Jan. 2019 - Mar. 2022

- **Asynchronous Data Pipelines:** Engineered high-volume data streaming and sorting applications using Kotlin and asynchronous audio pipelines.

CORE PROJECTS

Relational Adapter / Facade (Core Query Engine) Lead Developer | Active Development

- Designing a local-first data processing engine designed to execute relational SQL operations across non-relational data sources via a facade pattern.

Speed Score (Vertically Integrated Project) | Frontend Infrastructure Engineer | Active Development

- Engineered live-updating analytical data feeds driven by Server-Sent Events (SSE) inside React.
- Decoupled data-fetching pipelines to optimize throughput and handle rolling time-series constraints.

Professional Website | Lead Developer | Active Development

- *Developing a professional website using the MERN stack integrated with Next.js*
